致辞

随着中国经济持续增长，汽车、建筑机械、机床等各领域取得
了飞速的发展。那智不二越集团作为拥有多元化技术事业的综
合机械企业，通过提供多样化商品、服务和解决方案，为中国
市场的制造业作出了贡献。

那智不二越（江苏）精密机械有限公司作为株式会社不二越拓展
中国事业的核心基地，位于长江三角洲的要塞之地张家港市。

公司以精密刀具、液压机器、机器人、汽车电磁阀的制造为主，
针对中国市场的需求，除了产品的开发、改良以外，还提供售后服务。

源自日本和在世界各地广泛使用的NACHI品牌的产品已
在中国生产，并作为中国NACHI产品将不断提高客户满意度、
增加信赖感。

Message

In line with the expansion in China’s economy, we are experiencing
remarkable growth in automotive, construction equipment,
machine tool and a variety of other fields.

The Nachi Group is contributing to expansion in the manufacturing
world by providing a variety of products, services, and solutions to
China’s markets as a comprehensive machine manufacturer with
multifaceted operations and technologies.

Nachi (Jiangsu) Industries was established in Zhangjiagang, Jiangsu
Province, in the strategically important Yangtze (River) Delta area
as the Nachi Group’s key production facility in China.

We meet demands in the Chinese market with product
development, modification, and after-sales services at a
manufacturer in areas such as precision cutting tools, hydraulic
equipment, industrial robots, and automotive solenoids.

Created in Japan and used around the world, Nachi brand
products are now being manufactured in China. We are
maintaining the trust and increasing the satisfaction of customers
with Nachi products from China.
公司简介

公司名称  那智不二越（江苏）精密机械有限公司
地址  江苏省张家港市经济技术开发区（南区）南园路39号
邮编  215618
电话  0512-3500-7616
传真  0512-3500-7615
经营内容  精密刀具、液压机器、工业机器人、汽车电磁阀及相关零部件的开发、生产、销售及售后服务
注册资本  2,100万美元
设立  2012年3月（2013年2月投产）
用地面积  约54,000平方米

Company overview

Company name  NACHI (Jiangsu) INDUSTRIES CO., LTD.
Address  39 Nanyuan Road, Economic and Technological Development Zone (South),
Zhangjiagang, Jiangsu, China (Zip 215618)
Telephone  0512-3500-7616
Fax  0512-3500-7615
Products  Product development, design, manufacture, sales, and after-sales services for precision cutting tools,
hydraulic equipment, industrial robots, automotive solenoids and related parts
Capital  USD 21 million
Established  March 2012 (In production February 2013)
Site size  Approx. 54,000㎡
Precision cutting tools

As a comprehensive manufacturer of cutting tools, Nachi Fujikoshi handles a wide variety of tools from drills, endmills, broaches, and gear cutting tools to support the machining needs of customers throughout the lifecycle of their tools, including instructions on machining methods, the selection of tools, and regrinding.

We provide broaches and forming tools, which are essential to the production of automotive parts and other products. By capitalizing on our knowledge of manufacturing as a cutting tool manufacturer, we sharpen tools so they are as good as new.

In China, the demand for hydraulic equipment for urbanization, particularly for housing and water management, is growing, which means demand is increasing for hydraulic excavators in the smaller classes.

Nachi Fujikoshi has the largest share of the market for hydraulic equipment for mini excavators (under 1 ton), because of its energy efficiency and manufacturing in the mid-class are using our equipment even more.

On the other hand, the highest demand in the world for machine tools, also known as machine tools, is China, where customers demand machinery that is precise, efficient, and consumes little energy.

Nachi Fujikoshi's NSP series of hydraulic units, which are used for production machinery and many other machine tools, are very popular because of their energy savings and extensive lineup. We are producing these hydraulic units and hydraulic products for construction equipment.

Hydraulic Equipment

The infrastructure for urbanization in China (such as for housing and water management) is growing, which means demand is increasing for hydraulic excavators in the smaller classes.

Nachi Fujikoshi has the largest share of the market for hydraulic equipment for mini excavators (under 1 ton), because of its energy efficiency and manufacturing in the mid-class are using our equipment even more.

On the other hand, the highest demand in the world for machine tools, also known as machine tools, is China, where customers demand machinery that is precise, efficient, and consumes little energy.

Nachi Fujikoshi's NSP series of hydraulic units, which are used for production machinery and many other machine tools, are very popular because of their energy savings and extensive lineup. We are producing these hydraulic units and hydraulic products for construction equipment.

Robots
Nach: In the future, the need for automation and reorganization of manual work is expected to increase. As it is said, the fast economic expansion will cause a shortage in the labor pool. In response to customers' needs, our company began production in China before other manufacturers. We are manufacturing our flagship SRA series called the "Robots that are all for speed" and our LP series of polishing robots, making high-speed polishing possible. In the future, we will be increasing production models.
We are adding more than just manufacturing robots. By learning to operate robots at our newly opened training school and by the complete array of after-sales services we provide, we are building a system so our customers can use our products with complete confidence.

Automotive solenoid valve
The automotive solenoid valves we produce are used in automatic transmissions (AT) and CVT where they make driving smooth and comfortable by controlling the line pressure and clutch pressure when changing speeds. Nachi’s automotive hydraulic products emerged through a fusion of the high-reliability and mass-production technology developed for manufacturing automotive bearings and the high-pressure and excellent precision hydraulic technology developed in the fields of construction and production equipment.
We are already making advances as we develop solenoid valves that are the smallest in the industry as we work for lighter, smaller, higher responsiveness, and greater precision.

Nachi developed the world’s first electric-drive articulated welding robot in 1979 and then continued with heavy lifting, factory, and other robots, blazing trails in the industrial robot industry. In the future, the need for automation and reorganization of manual work is expected to increase as it has been said that the fast economic expansion will cause a shortage in the labor pool. In response to customers’ needs, our company began production in China before other manufacturers. We are manufacturing our flagship SRA series called the “Robots that are all for speed” and our LP series of polishing robots, making high-speed polishing possible. By learning to operate robots at our newly opened training school and by the complete array of after-sales services we provide, we are building a system so our customers can use our products with complete confidence.
技术中心

研究开发中心
那智不二越的产品在日本开发、设计。但是，在中国扎根的生产公司将吸收中国市场的需求，同日本总公司携手进行产品的改良、开发，给客户提供适应中国市场的产品。为此设置了可评价产品性能并进行耐久试验等的研究开发中心。

R&D center
Nachi Fujikoshi develops and designs most products in Japan. However, as a China-based manufacturer, we are working to satisfy demand in the Chinese market. We are cooperating with the main office to improve and develop products so we can supply to customers with products that suit the Chinese market. To do this, we built our own R&D center and facilities to test durability and evaluate the performance of our products.

展示厅、公开演示厅
那智不二越的产品涉及多领域，不在敏公司生产的产品也很多。为了介绍那智不二越集团的全貌，在介绍那智不二越集团概要的同时，使那智产品集聚一堂，根据各领域的需要设置了展示厅。由于仅靠展示厅还不足以让人理解和明白，故而设置了机器人实际演示、工具和机床实际加工的演示区域。从而能更直观地确认机器的运转状态，我们还准备了多个可容纳近200人的会议室，TV会议室及多功能厅。

Showroom and demonstration area
Nachi Fujikoshi has a wide variety of products, some of which we do not produce. We have built a showroom to exhibit all the Nachi-Fujikoshi products gathered together according to the field in which they are used, in addition to brief explanations of the Nachi Group. We have also built demonstration areas where cutting tools and machine tools are operated and robots are used because they are easier to understand when people can see them in action. Our range of meeting rooms can handle groups of up to 200 people and can also provide video conferencing.
那智不二越集团的主要事业

机床刀具事业
刀具
钻头，立式铣刀，丝锥，金属锯条，拉刀，滚刀，
剃刀，小齿轮切削刀具，滚齿刀
机床
拉刀研磨机，滚齿机，光整加工机床，
电动机，磨床
超精密加工机械
非球面加工机，精密切片机，平面磨床

功能部件事业
轴承
汽车轴承，工业机床轴承
液压机器
建筑机械用液压机器，工业机械用液压机器
汽车液压零件
汽车电控阀（三向阀，比例阀），汽车液压装置

材料事业
特种钢
高性能超合金，硬质棒材，极细硬质球材
工业炉
真空渗碳炉，真空脱脂净化装置，表面涂层

机器人事业
机器人
焊接-搬运机器人，超大型-重物搬运机器人，
无尘室用机器人

Machine & Cutting Tools
Cuttering tools
Drills, endmills, taps, metal band saws,
broaches, hobs, shaving cutters,
gear shaper cutters, forming racks
Machine tools
Broaching machines, forming machines,
power finishers, power cells, grinders
Precision Machinery
Aspheric generators, precision slicing machines,
surface grinders

Components
Bearings
Automotive bearings, industrial machinery bearings
Hydraulic equipment
Hydraulic equipment for construction equipment,
hydraulic equipment of production machinery
Automotive hydraulics
Automotive solenoid valves
(3-way valves and proportional valves),
automotive hydraulic units

Materials
Special steel
High-performance alloys, pre-hardened rods,
Micron Hard
Industrial furnaces
Vacuum carburizing furnaces,
vacuum degreasing equipment, and coatings

Robots
Robots
Robots for welding and loading,
robots for super large and heavy loads,
robots for clean rooms
